

KEEP US FREE FROM LNG!

YOUR OCEAN IS UNDER ATTACK BY FOREIGN FOSSIL FUEL

Three industrial facilities for liquefied natural gas (LNG), a ***polluting, climate-changing, expensive, foreign fossil fuel***, are proposed just off the New Jersey/New York coast, threatening our beaches, marine life, and economy—in short, our way of life.

- 1) **“Safe Harbor Energy” of Atlantic Sea Island Group:** proposes a massive manmade island by *dumping* 25 million tons of unknown material in the open ocean off the NY/NJ coast.
- 2) **“Liberty Natural Gas” of Excalibur Energy:** proposes four underwater snake-like turret systems that will scour and severely damage up to 76 acres of seafloor habitat 15 miles off Asbury Park, NJ and the Rockaways, NY.
- 3) **“BlueOcean Energy” of ExxonMobil:** wants to use our ocean as a lab rat with a plan to build a massive, experimental (never built or tried), floating storage bunker off Spring Lake, NJ, and Long Beach, NY.

California, Connecticut, and New York have rejected LNG projects off their coasts. Our Governors must reject them here, too. New Jersey and New York must choose green and renewable domestic energy that creates thousands of good, sustainable jobs.

PETITION TO SAVE OUR OCEAN:

We, the undersigned, oppose these foreign fossil fuel facilities in the ocean, and support the Clean Ocean Zone, which would prohibit these polluting and destructive activities and facilities.
